What Teachers Say...

"Once parents are trained on using the system, they are able to complete the ILPs and Progress Reports without any assistance, which saves me a LOT of time."

"I like that contact information, log notes, enrollment information, and historical grades are so easily accessible...right at my fingertips."

"I love that you can easily access a list what documents are waiting for teacher approval, and which ones have not even been started by the parent."

"It is so nice to have an area on the progress report that shows I have received an appropriate work sample, and the parent can see that. If I have not received a work sample (online or through the mail) for a particular subject, the parent can also see that in the system."

"It is so wonderful to be able to talk with a parent over the phone and be looking at and working on the same page in their student's ILP or PR at the same time."

What Parents Say...

"I love the [Brightways] site and its easy access! It is a great help and encouragement to me."

"I appreciate the higher level of computer-based communication and documentation that you have."

"The on-line ILP system is very convenient and easy to use. The option to select objectives above and below grade level is fantastic and very flexible."

Brightways Student Management System™ puts you one step ahead of possible future distance education program requirements, giving your program the ability to track, schedule and monitor progress toward mastery of state education standards. We can also develop custom features for a more refined fit to your particular program.

Lead a Distance Education or Homeschool Support Program that Fosters Student Success, Satisfies Parents, & Boosts Staff Efficiency

Brightways Student Management

Quality Web-based Tools & Services for Managing Distance Education Programs
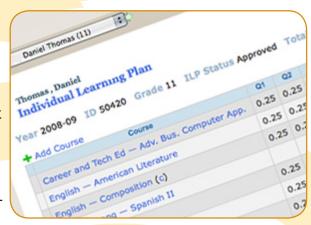

www.BrightWaysLearning.com

Designed for distance education and homeschool support programs, **Brightways Student Management System™** provides powerful, easy-to-use, online tools to manage student information, create learning plans, track student progress, improve communications, and generate custom reports. Includes dynamic parent, teacher, and administrative portals, with convenient access to current data.

Enrollment & Transcript Management

❯ Easily manage multiple student enrollments and status

❯ Streamlined input of transfer courses and historic credits

❯ Automated credit and graduation requirement tracking

❯ One-click transcript generation

❯ Transcript customization with watermark, graduation requirements, and other school-specific information

Standards-based Individual Learning Plans

❯ Course-by-course development of each student's Individual Learning Plan (ILP)

❯ Integrated Alaska GLEs and other Content Standards

❯ Customizable course list, curriculum sources, and assessment types (as applicable)

❯ Curriculum map to organize standards-based coverage through-out the year

❯ Teachers can individually approve each course on an ILP

Grades & Work Samples

❯ Term-based Progress Report forms automatically match Individual Learning Plan

❯ Quick and easy grade input and skill-tracking

❯ Ability to upload Work Sample files and associate with specific course

Basic Management & Security

❯ Variable role-based and task-specific access (administration, staff, teachers, parents)

❯ Multiple program management capabilities

❯ Collect and manage family and student contact information and demographics

❯ Multiple Log Note types with automated author and date stamps; Log Report compiles all log entries (by student) into a single report; Tracks "last contact" date by teacher for family and student

❯ Integrated new enrollment form and easy re-enrollment

❯ Encrypted secure login access and daily data backups

Custom Query Tools for State & Other Reporting

❯ Collects and manages necessary data for state and federal reporting, including OASIS

❯ Ability to select data fields and specify variables for custom-query reports

❯ One-click data export to spreadsheet (csv) files
